

# RELink<sup>®</sup>

RELink has been designed to provide an integration solution for organizations wishing to tie their Raiser's Edge Fundraising solution to their MIP General Ledger. RELink provides a 1 step integration between Raiser's Edge Gift and Pledge receipts allowing the transaction file to be posted directly to the MIP General Ledger.

Simple, single screen design allows for One Click importing of your Raiser's Edge transaction file

MIP Chart of Account numbers are associated within the Raiser's Edge Campaigns, Funds and Appeals section. General Ledger Account relationships are created at the Fund Level by gift type in Raiser's Edge. RELink then automatically adds the additional transaction data that does not exist in a standard Raiser's Edge Posting file and auto reformats the file into the proper MIP format. The valid posting file, created by RELink, then is posted to the MIP General based on your selected Posting Method in a single step. This eliminates the time consuming 2nd manual step of having to import the Raiser's Edge file from within the MIP General Ledger.

## RELink Posting Features

- Supports transaction source posting as either a Journal Entry or Cash Receipt.
- Supports Batch to Post or Online Posting Methods
